KEYWORDS

Reckless — Reveal 1 additional modifier from the Grid for this task.

Teamwork — Characters at your setting may use 1 Attribute Marker to get 1 additional Impact (instead of +2).

Flexible — Characters at your setting may use 1 Attribute Marker of any attribute as if it is matching.

Hopeful — Characters at your setting may spend Hope to add +1 for each Hope spent.

Shape modifiers — Reveal the specified number of modifiers. Then, choose the same number of revealed modifiers and shuffle them back into the Grid. These can be different modifiers than those just revealed. (Activate Enemies for each Skull revealed.)

Recycle / Trash — When you ***Recycle*** or ***Trash*** a Tool, return it to your tool kit (if recycled) or add it to the trash pile (if trashed). Activate only during your turn.

ROUND OVERVIEW

Character Phase

Each character takes their turn by performing 3 actions. (Characters take turns in any order, but must finish their turn before passing.)

Encounter Phase

1. Resolve all effects that happen "When the encounter phase begins".
2. The corporation places 1 Hacking Cube on each State in the Network.
3. Trigger 1 Surveillance per character.
4. Enemies surveil: Trigger 1 Surveillance for each Enemy at a location with one or more characters. (Ignore retreated Enemies.)
5. Flip retreated cards face up.
6. Flip action trackers to their unspent side.
7. Each character draws 1 encounter card.
8. Characters resolve their encounter card without consultation (starting with the responsible character in clockwise order).

ICON OVERVIEW

Attributes:

SEARCHING FOR YOUR FRIEND
Chapter – 1 | Back

Plot Twist

You spot your friend, André, standing close to a neon-lit corridor, which leads deeper inside the club. Next to him are a blonde woman and a bald man. You shout, but your voice gets drowned out by the music.

Suddenly, you hear a loud sound behind you, and a group of people in uniform push through the crowd. They seem to be searching for someone. André looks over his shoulder, but your eyes do not meet. Then, he and his companions quickly head down the neon-lit corridor.

Game Progression

- Find all (5) regular Enemies in the staging deck. These are: 3x **»Corp Loyalist«**, 2x **»Freelance Security Officer«**. Each character draws 1 of them at random. Shuffle the remaining regular Enemies into the encounter deck. (Enemies you draw appear at your location.)
- Put the **»Backstage«** Setting into play from the staging deck. (Follow its setup instructions.)

BACKSTAGE AT THE SYPHON
Chapter – 2 | Back

Plot Twist

You hear someone shout behind you: "Sir, they headed in here!"

A small man wearing a Nubicon corporate security uniform enters the dark room, flanked by a group of officers. They have you cornered.

The man looks surprised as your eyes meet, as if he had expected someone else. However, he quickly regains his composure and says with a friendly smile: "My name is Mark, and Nubicon would thank you for your cooperation in this matter. We are looking for one of our employees named André Picard – and we think you might know him."

Game Progression

- Find **»Mark 'Steelskin' Caspar«** in the staging deck. He appears at the location of the active character.
- Find **»Dimly-Lit Security Door«** in the staging deck. It appears at the **»Syphon«** (bottom).

FIGHT OR FLIGHT
Chapter – 3 | Back

Plot Twist

At first, the freelance security officers were annoyed when you did not answer their questions, but what surprised them was that you fought back. Few people dare to attack someone with a stunner. This moment of surprise helped you and the other folks in the hidden basement to overcome Mark and break through to the main dance floor.

In the ensuing chaos, you slip out through the club's front entrance.

KEYWORDS

Confrontation — You cannot move away from the location with this card.

Unpredictable — When you reveal a printed regular Skull to modify your attribute, treat it as the Epic Fail instead.
(Do not reveal additional modifiers. Activate Enemies as normal.)

Follow-up — After you fully resolved this encounter card, draw 1 additional encounter card.

Stationary — This Enemy cannot move. Ignore it when you determine which Enemy moves.

Protected — Your final number of Impact for this task is halved (rounded up).

Analyze modifiers / encounter cards — Look at the specified number of unrevealed modifiers from the Grid or cards from the top of the encounter deck. Normally, you are allowed to manipulate those components. For example: archiving modifiers, or discarding cards. Afterwards, reshuffle the unrevealed modifiers in the Grid or the encounter deck.

ENEMY ACTIVATION

When you reveal a Skull to modify your attribute: reveal 1 additional modifier.
(Repeat if you reveal multiple Skulls.)

Then, you determine if you succeed or fail, resolving all effects resulting from it as normal (such as dealing Damage or retreating cards).

After any action or effect that revealed one or more Skulls ends: activate Enemies once for each Skull revealed.

Perform the following steps in order:

› **All Enemies at your location attack you.**
Sum up their threat icons and suffer as much Stress and/or trigger Surveillance.

› **One Enemy moves to your location.**
Enemies only move if they are at a location without a character. Prioritize the Enemy with the most remaining health.

ACTION OVERVIEW

Change Location: Move your character standee to another location (at any setting).

Tasks

› **Investigate:** Remove 1 Secret.

› **Get Support:** Obtain 1 support marker of your choice.

› **Fight:** Deal 1 Damage.

› **Hack:** Place 1 Hacking Cube.

FELINA DRUCKER

As a junior reporter, you dreamed about breaking a big story that would topple a CEO. Instead, you ended up reviewing gadgets and rephrasing press releases. The interviews you did were never soft, but you did not relentlessly interrogate people, either. Maybe it was because you wanted to believe their vision of the future where technology would solve everyone's problems.

When early commercial implants became available, you were among the first to get an Augmented Reality retina, rarely turning the meta reality off. Some people think this is weird, but you consider yourself just to be a little ahead.

You secretly never stopped looking for that one story. Surely, all those contacts you collected over the years must be worth something. One day, you will land your big scoop.

The future will be bright – you are certain of this. There will be prosperity and wealth for everyone built by machines driven by AI software. This AI will be able to perform any and all work for humanity. Your plan is to build a foundation for a better, more hopeful tomorrow.

Some people say you are strengthening surveillance capitalism, giving even more power to the establishment that's known for exploiting the weak. But those people do not dream big enough. AI taking over the human workforce is a good thing. People will be free to enjoy their lives – make art.

The status quo must be questioned in order to envision a true social-democratic utopia. And people like you will take it upon themselves to drive humanity towards that bright future.

LARX KRAJEWSKI

You always had this tendency to act without thinking to right wrongs, especially when your friends are mistreated. This has earned you respect, but was also where all your problems came from: You had a stable job in corporate security – until the incident. Afterwards, the only job you were able to land was working as a bouncer.

At first, you hated it. But as your anger cooled, you started to like it. People respected you. Here, you were able to enforce your own rules; rules that made sense. Sometimes, your own rules clash with those of society. But if there is one thing you learned from all of this, it is that not all laws are just. Sometimes, people have to stand up and do what is right.

Every job you have ever had ended before you could make it to a full year. This unfortunate luck was never even your own fault. You were hard-working and "exceeding expectations" (as they call it these days). But there were restructures, unexpected economic headwinds, or a need for the Q4 bonuses to come from somewhere. They always laid off the most junior employees – including you.

Since then, you had an odd job here and there, trying to keep afloat with gig work, making just enough to stay out of social security. Through these jobs, you met many people. Most of them are scraping by just like you, making it from one paycheck to the next. It became clear to you that something needed to change. You were not unlucky, the system was set up for people to be left behind. It was time to bring a community together to fight back and ensure that everyone would profit from those corporate gains.
